

## DR SERIES SHELVING

An all-new boltless shelving system, our DR Series shelves clip together in minutes to create the perfect solution for office and archive storage.

- Quick assembly
- No tools required
- Ideal for files, archives, components and parts
- Great solution for the home garage

Do away with tools and easy-to-lose parts! Our DR or “Double Rivet” range simply clips together using a rivet and keyhole system. The final result is very robust - once the protruding rivets are fitted into place they are snugly locked and will need a good knock from the underside to remove.

While we have simplified the assembly, we have retained the adaptability of our popular STACK-iT Series. DR shelving comes in section lengths so it can be sized to fit your space. Should your storage needs continue to grow, simply add on an extra bay or two down the track.

Made from durable powder coated steel and MDF boards, this is a very sturdy, industrial quality product which comfortably holds up to 100kg per shelf. With a smart ‘bullet grey’ finish, this product looks fantastic around the office or in a retail environment. It is the perfect size for storing files and boxes and also makes an excellent home garage shelving system.
