

## STACK-IT WORKBENCH

We offer a range of sturdy workbenches and assembly tables, available seperately or in combination with our shelving and industrial storage systems.

- Sturdy and strong
- Bench-shelf combinations available
- Smart powder coated finish
- Mobile option available
- Modular system offers maximum flexibility

Our workbenches are constructed from the same high quality materials as our STACK-IT Series Shelving. STACK-IT workbenches are ideal for use in the factory situations as a work surface for assembly or servicing, or in the home garage for weekend DIY projects.

Our standard workbench is 2100mm long x 700mm deep, offering plenty of space to accomodate large tools and parts. The MDF top is 24mm thick and the workbench includes an ajustable bottom shelf. We offer length options and a range of MDF allowing customization where required.

STACK-IT workbenches are available with 100mm braked castors to give mobile flexibility. We also offer a 2mm steel skin for the top giving the work bench durability for heavy mechanical work.
