

# MR SERIES RETAIL SHELVING

**Gondola style retail shelving provides practical and attractive displays for the in-store environment.**

- Ideal for trade retail environments
- Simple to assemble - clips together without bolts
- Very price competitive
- Custom colour kick plates and top hats available

Our gondola style retail shelving is especially popular with stores that cater to the trade audience. Single sided units can sit against the wall whilst double sided units can be set up as islands that allow customers to browse down the aisles and select their product.

When it comes to retail, aesthetics are a key factor. We offer our shelving in either Artic white or Ghost grey, both of which compliment the airy, well lit atmosphere that helps to encourage sales. Standard units come with four shelves that narrow at the top for a more attractive display.

For practical purposes, STACK-IT retail shelves are easily accessorised with label holders, wire product restrainers and peg board style backs for hanging items. Installation is bolt-free and simply involves clipping the units together. Once assembled, the shape of the units makes them very stable, therefore, bolting to the floor is not required.

Its a simple affordable solution that looks great, and it works!  
If you have a need for a retail or display system that ticks all the boxes, call us today!
