

THE 'STACK-IT' SERIES SHELVING

A cost-effective solution for the warehouse, workshop or office storage, the STACK-IT Series is a light and adaptable version of the popular longspan shelving concept.

- Easy to assemble
- Available in a range of heights and lengths
- Sturdy and robust
- Modular flexibility

Adaptable, strong and offering great value for money, the STACK-IT Series could be just the storage solution you've been looking for. Perfect for goods that are stored by hand, the STACK-IT Series design is based on the pallet racking concept. STACK-IT Series shelving comes in a range of lengths and heights which means the system can be tailored to fit the measurement of your particular space. With capacity for up to 10 shelves per bay, the configuration possibilities are endless.

The STACK-IT Series system comprises of powder coated bolt together upright frames connected by super strong Z beams with an 18mm MDF shelf board. Assembly is very simple and the shelving bays are designed to automatically 'square up' as the shelf board is inserted. The modular flexibility of the system allows for more bays or shelves to be added as your storage requirements increase. One piece bolt down feet provide for an 8mm floor anchor on every foot.

Our most popular product, the STACK-IT Series range solves the storage needs of a wide range of businesses. Some of our customers have included dentists, car parts wholesalers, lawyers, oil shops, taxidermists, plumbers, electricians, manufacturers, importers, clothing shops and more.
