

HEAVY DUTY CANTILEVER RACKING

- Modular
- Selective storage
- Height adjustable arms
- 500kg per arm static load capacity
- Powder coat or galvanised finish
- Self supporting with floor fixing points provided

Long length products can be awkward to store and even harder to retrieve. Heavy Duty Cantilever racking helps to maximise selectability by providing the capability to store long length products without any vertical obstructions. This makes it easy for you to pick stock without having to shift other products around. Our heavy duty system is made from roll formed steel which is engineered to withstand heavy loads making it a very durable storage solution, which is important to provide a safe work-space. Being a modular system, cantilever racking provides storage flexibility which allows you to add on as your business grows.

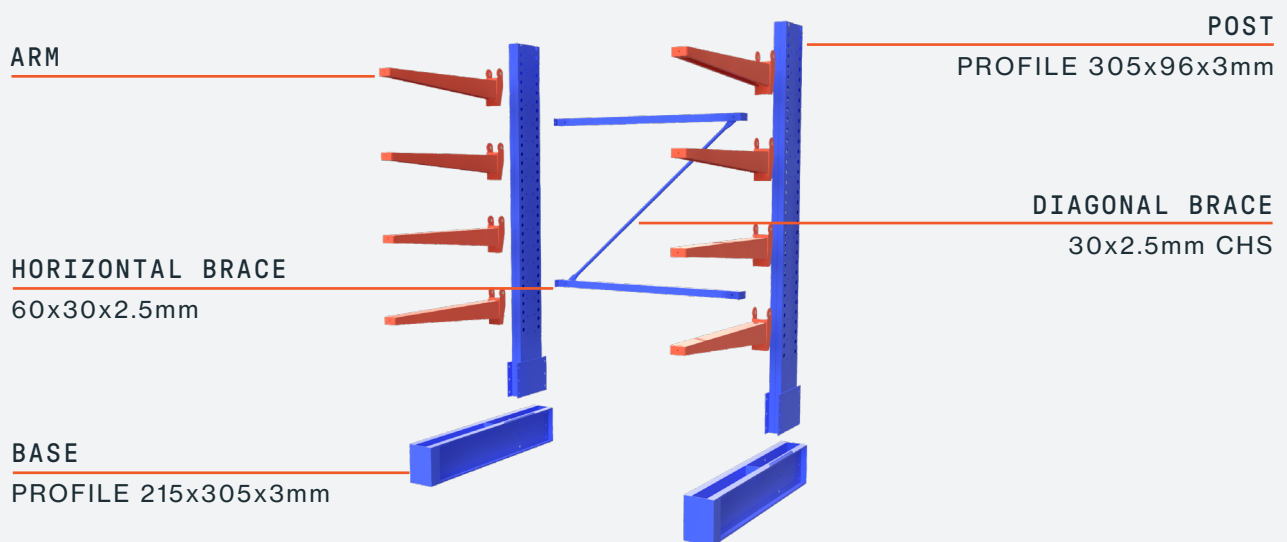

HEAVY DUTY CANTILEVER RACKING SPECIFICATIONS

POST HEIGHT	POST SPACING	ARM LENGTH	FINISH	CAPACITY
2000, 3000, 4000, 5000, 6000mm	900, 1200, 1800mm	1000, 1200, 1500mm	Powder coat, Galvanised	500kg per Arm

Custom sizes, colours and capacity available on indent order.

Shelf capacities are indications only. The actual capacity may vary. An engineer's assessment of your shelf configuration and ground conditions are required to establish actual capacity. Please contact us if you wish to obtain an assessment.
